ABOUT ME

Tech-driven and passionate about computer science and new technologies, I enjoy learning and taking on new challenges. With a strong grasp of modern development stacks and a focus on translating business needs into practical digital solutions, I thrive at the intersection of business and technology. Curious, rigorous, and a fast learner, I value teamwork and collaborative environments that support effective IT project delivery.

SKILLS

Python
Java/Spring Boot
Laravel/PHP
Flutter, React
JS/CSS
SQL/MySQL
Cisco networking
Docker
CI/CD
BPMN
UML
Business Analysis

LANGUAGES

- French (native)
- Portuguese (native)
- English (Fluent)
- Italian (basic)
- German (basic)

SOFT SKILLS

Problem-solving, Teamwork, communication, critical thinking, attention to detail, fast learner

EXPERIENCE

ARA Association | Tutor

2023 - 2025

- Provided personalized academic support in English and IT, including Python and networking, for 3 to 5 students per week.
- Prepared teaching materials and tracked student progress.
- Applied strong problem-solving skills to address individual learning challenges and improve academic outcomes.

Collège de Drize | Administrative Assistant

2020 - 2021

- Managed daily administrative tasks, reception, and student records.
- Streamlined mail and communication distribution, including large-scale email campaigns.
- Used Word and Excel to maintain data accuracy in a bilingual educational setting.

PROJECTS

Mobile Communication App for Firefighters of Plan-les-Ouates

- Developed a full-stack mobile communication app for 30+ users using PHP/Laravel and JS/CSS.
- Contributed to requirements gathering, task backlog management, and system architecture design.
- Implemented a secure MySQL backend with token-based API authentication.
- Collaborated in an Agile Scrum environment, performing code reviews and troubleshooting integration issues.

Bachelor Thesis – Generative AI for Competitive Map Design

- Developed a hybrid pipeline for competitive map generation in Counter-Strike, combining procedural generation, machine learning, and evolutionary optimization.
- Built and validated a dataset of 230 maps.
- Used three AI models: Random Forest, genetic algorithm and a Reinforcement Learning PPO.
- Automated the generation process to produce valid map layouts in under 10 minutes, significantly reducing the initial design time.

EDUCATION

Bachelor of Science in Business Information Systems

Haute école de Gestion de Genève (HEG)

March 2026

- Studied Business Information Systems at HEG Geneva, with a focus on information systems, databases, programming, networks, and business analysis.
- Completed projects in UML modelling, systems administration, and mandatory professional projects.
- Strengthened both technical and analytical skills.

Maturité professionnelle commerciale (3mp+1)

École de commerce Aimée-Stitelmann

September 2021

- Completed specialized courses in office computing, economics, management, and accounting.
- Completed a two-week professional internship at Espace Entreprise.
- Followed reinforced language courses in English, German, and Italian.
